Please do not send cash in the mail. Crystal file is not guaranteed for breakage.

INSTRUCTIONS

Step #1—File and Shape Nails

Decide on the desired length and shape of the nails. The Crystal File has thousands of tiny razor sharp cutting edges, which professionally cut, and shape the nail smoothly and evenly. Unlike conventional files, the Crystal File can be used in both directions. Emery boards and diamond or steel files leave tiny tears in the tip of the nails allowing moisture and detergents to penetrate, causing splitting, chipping, and peeling. Use either end of the file to gently push back the cuticle at the base of the nail.

Step #2—Black Pad--Clean

The black #1 pad removes ridges, blemishes and stains. Buff the entire surface of the nail once and thereafter buff the new growth at the base of the nail.. *Use Once Only Every Four Weeks!*

Step #3—White Pad--Condition

The white #2 pad brings the natural oils of the nail to the surface, producing a pink and healthy nail, with a smooth satin texture. It also massages the nail, stimulates blood circulation beneath the nail, which enhances growth. *Use This Pad Every Two Weeks!*

Step #4—Gray Pad--Shine

This pad brings the nail to a beautiful glossy shine. A perfectly manicured nail, with the nail surface sealed against moisture and dirt as the result. The faster the buffing, the harder the shine and the longer it will last. When the shine begins the dull, just use this pad again. The shine should last 7 to 10 days. *Use As Often as Desired!*

Notes

If desired, follow with Nail White and then Nail Hardener. After polishes are set, apply Cuticle Treatment.

"Committed to providing only the finest in Natural Nail Care Products"

IMPORTANT INSTRUCTIONS!!!

Always start with clean hands making sure any hand cream residue is removed. This could clog the working surfaces of your pads. For best results, keep pads and file as dust free as possible. They can easily be cleaned with a toothbrush. The surfaces can be cleaned with alcohol and a makeup sponge. This will remove any oil, especially important with the #3 pad...It should always appear dull...not shiny. Remember that #1 and #2 pads are used on the entire surface of the nail only the first time after that they are used only on new growth #1 monthly and #2 bi-monthly.

Our Cuticle Treatment is designed to soften and condition dry cuticles using only the finest natural oils available.

Ingredients include Almond Oil, Sesame Oil, Evening Primrose, and Tea Tree Oil to name a few. Our oil comes in a pump action pen for your convenience. Retinol is added to shrink the cuticle against the surface of the nail.

To start the flow of oil gently depresses the tip. It is Hypo-Allergenic and Formaldehyde free. Carry it with you and use as often as desired.

Our **Nail Hardener** is scientifically designed and formulated to strengthen and harden the surface of finger and toe nails without using harmful chemicals. It is Hypo-Allergenic and Formaldehyde free.

This product contains a polyester resin which bonds with the fibers on the surface of the nail giving the nail added backing. This polish can be used as a base coat to protect the nail from the formaldehyde found in most polishes. Can also be used as a top coat sealer. Also dries in 60 seconds.

Our **Nail White** is an ultra violet polish designed to blend light onto the surface of the nail highlighting the natural color. Since this polish works with light rays, the bolder the light the bolder the look of the nail.
